TIME TRAVELER

Kiddie Rides USA restores authentic coin-operated children's rides back to their original beauty. These rides have been staples of amusement parks for decades. Once a genuine piece is located, it undergoes a mechanical inspection and tune-up. Next, the piece is stripped down to its raw fiberglass shell and refurbished with high-end auto paint, returning the ride to its former glory.

RIDING HIGH

This 2-foot by 4-foot, sixty-second ride can be enjoyed by children and adults of all ages. A favorite among kids for its bouncy motions, the rides can also be displayed in the home as a decorative art piece and admired from afar.
